

#### IV. REMARKS

The requested amendments to the specification are made by presenting replacement paragraphs, marked to show changes made to the immediate prior version thereof. The changes in the replacement paragraphs are shown with underlining for added matter, and strike-through for deleted matter. The requested changes are necessary for correction of formal matters and inadvertent mistakes in the specification, and for proper disclosure thereof, and do not require a substantial amount of additional work on the part of the Office. Paragraphs [0006], [0013], [0021], [0022], [0026] and [0028] include correction of inadvertent typographical errors. Paragraphs [0009] through [0011] are revised for conformance with paragraph [0008] and the specification in general, changing the word "can" to -- drink -- referring to the recessed holder in the unit. The Abstract paragraph is revised for both inadvertent typographical errors and for improved conformance changing the word "can" to -- drink -- for the same reasons.

The requested amendments to the drawings are made by presenting replacement FIGS. 1-17 for FIGS. 1-17 filed with the application. The replacement figures are presented on Replacement Sheets 1 through 4 for sheets 1 through 4 filed with the application. The replacement figures incorporate changes to formalize presentation of the reference numerals and leader lines only. No other changes are made in the replacement figures.

Applicant respectfully requests favorable consideration, and recommendation for entry of this Amendment.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Keith Frantz", written over a horizontal line.
